

Technical Information

Clean Pond™

Description: Clears water of brown or yellow stains.

Type: Water Conditioner

- Main Points:**
- Clears water of brown and yellow stains
 - Removes winter sludge
 - Phosphate and Nitrate free
 - Treats 3,000 gallons

Description: Oxidizes suspended and dissolved organic matter for superior water quality • Use when water quality drops due to heavy bio-loading. • Particularly useful to oxidize built up winter sludge • Safe in all water gardens and ponds.

Directions: Add one dose only of 1 tablespoon (3 capfuls or 15 ml) per 100 gallons (378 liters) of system capacity. Can be repeated at 4 day intervals until water garden is clean.

Considerations for use: Oase® Clean Pond™ oxidizes organic materials to provide a cleaner, healthier environment for your fish. Clean Pond™ is strong and should be handled with care! It stains skin and clothing!

Clean Pond™ must not be used on systems less than 30 days old. There must be enough organic matter either dissolved or suspended in the water to necessitate treatment. To test the water, fill a clear glass jar with pond water. If the water appears yellow or brown, the treat with Clean Pond™. Treatment may be repeated at 4 day intervals until the pond is clean.

During treatment the water may turn purple, brown, then clear up. It is recommended that you suspend carbon or resin filtration and trace mineral and vitamin supplements during use. A partial water change is recommended at the termination of treatment. Do this by syphoning water out of the pond and adding new fresh water. Be sure to treat the replacement water with Oase® Water-Prep™ to remove chlorine or Water-Prep Plus™ to remove chloramines. If immediate termination of treatment is desired, a single dose of Oase® Water-Prep Plus™ will deactivate this product.

Contents: Deionized water, manganic acid salts

Precautions: Contains manganic acid salts. **FIRST AID: If in eyes, flush with water for 15 minutes. If ingested, give large quantities of water. THEN CONTACT A PHYSICIAN IMMEDIATELY!** Contact with skin causes brown stains, wash off immediately. Not for human consumption. Not for fish used for human consumption. For ornamental fish use only. Do not use in natural bodies of water! Keep out of reach of children!
